This Statement of Additional Information (“SAI”) is not a prospectus and it should be read in conjunction with the Prospectus dated October 31, 2016, as may be revised, for the Zevenbergen Growth Fund and the Zevenbergen Genea Fund (each a “Fund”, together the “Funds” or “Zevenbergen Funds”), each a series of Trust for Advised Portfolios. Zevenbergen Capital Investments LLC (the “Adviser” or “ZCI”) is the Funds’ investment adviser. The Funds’ most recent annual report to shareholders is incorporated by reference into this SAI. A copy of the Prospectus and of the annual report may be obtained by contacting the Funds at the address or telephone number above or, with respect to the Prospectus, by visiting the Funds’ website at www.zci.com/funds.

THE TRUST

The Trust is a Delaware statutory trust organized under the laws of the State of Delaware on August 28, 2003, and is registered with the U.S. Securities and Exchange Commission (the “SEC”) as an open-end management investment company. Between August 28, 2003 and May 31, 2005 the Trust was named “Lotsoff Capital Management Equity Trust.” Between June 1, 2005 and November 30, 2011 the Trust was named “Lotsoff Capital Management Investment Trust.” Between December 1, 2011 and January 30, 2013 the Trust was named Ziegler Lotsoff Capital Management Investment Trust.” Between January 31, 2013 and January 29, 2014 the Trust was named “Ziegler Capital Management Investment Trust.”

The Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”) permits the Trust’s Board of Trustees (the “Board” or the “Trustees”) to issue an unlimited number of full and fractional shares of beneficial interest, no par value per share, which may be issued in any number of series. The Trust consists of various series that represent separate investment portfolios. The Board may from time to time issue other series, the assets and liabilities of which will be separate and distinct from any other series. This SAI relates only to Zevenbergen Growth Fund and Zevenbergen Genea Fund.

Registration with the SEC does not involve supervision of the management or policies of the Funds. The Prospectus of the Funds and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC’s website at www.sec.gov.

INVESTMENT POLICIES

The discussion below supplements information contained in the Funds’ Prospectus as to the investment policies and risks of the Funds.

Non-Diversification

The Funds are non-diversified under the Investment Company Act of 1940, as amended (the “1940 Act”), which means that there is no restriction as to how much the Funds may invest in the securities of any one issuer. However, to qualify for tax treatment as a regulated investment company under the Internal Revenue Code of 1986, as amended (the “Code”), each of the Funds intends to comply, as of the end of each taxable quarter, with certain diversification requirements imposed by the Code. See “Distributions and Tax Information” below. As a non-diversified investment company, each Fund may be subject to greater risks than diversified companies because of the larger impact of fluctuation in the values of securities of fewer issuers.

Percentage Limitations

Whenever an investment policy or limitation states a maximum percentage of each Fund’s assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of each Fund’s acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered in determining whether an investment complies with each Fund’s investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by each Fund, each Fund may receive stock, real estate or other investments that each Fund would not, or could not buy. If this happens each Fund would sell such investments as soon as practicable while trying to maximize the return to its shareholders.

Each Fund may invest in the following types of investments, each of which is subject to certain risks, as discussed below:

Equity Securities

All investments in equity securities are subject to market risks that may cause their prices to fluctuate over time. Historically, the equity markets have moved in cycles and the value of the securities in each Fund's portfolio may fluctuate substantially from day to day. Owning an equity security can also subject each Fund to the risk that the issuer may discontinue paying dividends.

Common Stocks. A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which each Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to each Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to each Fund.

Convertible Securities. Each Fund may invest in convertible securities. Traditional convertible securities include corporate bonds, notes and preferred stocks that may be converted into or exchanged for common stock, and other securities that also provide an opportunity for equity participation. These securities are convertible either at a stated price or a stated rate (that is, for a specific number of shares of common stock or other security). As with other fixed income securities, the price of a convertible security generally varies inversely with interest rates. While providing a fixed income stream, a convertible security also affords the investor an opportunity, through its conversion feature, to participate in the capital appreciation of the common stock into which it is convertible. As the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the price of a convertible security tends to rise as a reflection of higher yield or capital appreciation. In such situations, each Fund may have to pay more for a convertible security than the value of the underlying common stock.

Initial Public Offerings ("IPOs") and Unseasoned Company. Each Fund may purchase securities of companies that are offered pursuant to an IPO and/or companies that have recently become public. The risk exists that the market value of IPO shares will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer. The purchase of IPO shares may involve high transaction costs. IPO shares are subject to market risk and liquidity risk. If the Fund's asset base is small, a significant portion of the Fund's performance could be attributable to investments in IPOs, because such investments would have a magnified impact on the Fund. As a Fund's assets grow, the effect of the Fund's investments in IPOs on the Fund's performance probably will decline, which could reduce the Fund's performance. Additionally, investments in unseasoned companies may involve greater risks, in part because they have limited product lines, markets and financial or managerial resources. In addition, less frequently-traded securities may be subject to more abrupt price movements than securities of larger capitalized companies. The level of risk will be increased to the extent that the Fund has significant exposure to smaller capitalized or unseasoned companies (those with less than a three-year operating history).

Rights and Warrants. Each Fund may invest in rights and warrants. A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock, and it is issued at a predetermined price in proportion to the number of shares already owned. Rights normally have a short life, usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the current market. Warrants are options to purchase equity securities at a specific price for a specific period of time. They do not represent ownership of the securities, but only the right to buy them. Hence, warrants have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. The value of warrants is derived solely from capital appreciation of the underlying equity securities. Warrants differ from call options in that the underlying corporation issues warrants, whereas call options may be written by anyone.

An investment in rights and warrants may entail greater risks than certain other types of investments. Generally, rights and warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, although their value is influenced by the value of the underlying security, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights and warrants increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Real Estate Investment Trusts. In general, a real estate investment trust (“REIT”) is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets certain definitional requirements of the Code. The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs, and hybrid REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depend upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for the favorable U.S. federal income tax status generally available to REITs under the Code or to maintain exemption from the 1940 Act.

When a Fund invests in REITs, it is subject to risks principally associated with investing in real estate: (1) possible declines in the value of real estate, (2) adverse general and local economic conditions, (3) possible lack of availability of mortgage funds, (4) changes in interest rates, and (5) environmental problems. In addition, real estate investment trusts are subject to other risks related specifically to their structure and focus: (a) dependency upon management skills; (b) limited diversification; (c) the risks of locating and managing financing for projects; (d) heavy cash flow dependency; (e) possible default by borrowers; (f) the costs and potential losses of self-liquidation of one or more holdings; (g) the possibility of failing to maintain exemptions from securities registration; (h) duplicative fees; and in many cases,

relatively small market capitalization, which may result in less market liquidity and greater price volatility.

Preferred Securities. Each of the Funds may invest in two basic types of preferred securities, traditional and hybrid-preferred securities. Traditional preferred securities consist of preferred stock issued by an entity taxable as a corporation. Preferred stocks, which may offer fixed or floating rate dividends, are perpetual instruments and considered equity securities. Preferred securities are subordinated to senior debt instruments in a company's capital structure, in terms of priority to corporate income and claim to corporate assets, and therefore will be subject to greater credit risk than debt instruments. Alternatively, hybrid-preferred securities may be issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics, or by an affiliated trust or partnership of the corporation, generally in the form of preferred interests in subordinated debentures or similarly structured securities. The hybrid-preferred securities market consists of both fixed and adjustable coupon rate securities that are either perpetual in nature or have stated maturity dates. Hybrid-preferred securities are considered debt securities. Due to their similar attributes, the Adviser also considers senior debt perpetual issues, certain securities with convertible features as well as exchange-listed senior debt issues that trade with attributes of exchange-listed perpetual and hybrid-preferred securities to be part of the broader preferred securities market.

Preferred securities pay fixed or floating dividends to investors and have "preference" over common stock in the payment of dividends and the liquidation of a company's assets. This means that a company must pay dividends on preferred stock before paying any dividends on its common stock. In order to be payable, distributions on such preferred securities must be declared by the issuer's board of directors. Income payments on preferred securities may be cumulative, causing dividends and distributions to accumulate even if not declared by the board of directors or otherwise made payable. In such a case, all accumulated dividends must be paid before any dividend on the common stock can be paid. However, many traditional preferred stocks are non-cumulative, in which case dividends do not accumulate and need not ever be paid. Each Fund may invest in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any missed payments to its stockholders. There is no assurance that dividends or distributions on the traditional preferred securities in which the Funds invest will be declared or otherwise made payable. Preferred securities may also contain provisions under which payments must be stopped (namely, stoppage is compulsory, not discretionary). The conditions under which this occurs may relate to, for instance, capitalization levels. Hence, if a company incurs significant losses that deplete retained earnings automatic payment stoppage could occur. In some cases the terms of the preferred securities provide that the issuer would be obligated to attempt to issue common shares to raise funds for the purpose of making the preferred payments. However, there is no guarantee that the issuer would be successful in placing common shares.

Preferred stockholders usually have no right to vote for corporate directors or on other matters. Shares of traditional preferred securities have a liquidation preference that generally equals the original purchase price at the date of issuance. The market value of preferred securities may be affected by, among other factors, favorable and unfavorable changes impacting the issuer or industries in which they operate, movements in interest rates and inflation, and the broader economic and credit environments, and by actual and anticipated changes in tax laws, such as changes in corporate and individual income tax rates. Because the claim on an issuer's earnings represented by traditional preferred securities may become onerous when interest rates fall below the rate payable on such securities, the issuer may redeem the securities. Thus, in declining interest rate environments in particular, each Fund's holdings of higher rate-paying fixed rate preferred securities may be reduced, and each Fund may be unable to acquire securities of comparable credit quality paying comparable rates with the redemption proceeds.

Sector Emphasis

Each of the Funds may, from time to time, have greater than 25% of their assets in one market sector (but not greater than 80% in any one market sector). To the extent that the Funds focus their investments in one or more sectors, they may be subject to the risks affecting that sector more than if they were a more broadly diversified fund. The Adviser's judgment about which sectors offer the greatest potential for long-term financial reward may, and likely will, change over time. Market conditions, interest rates, and economic, regulatory, or financial developments may affect all the securities in a single sector. If a Fund invests in a few sectors it may have increased exposure to the price movements of those sectors.

Consumer Discretionary. Changes in the domestic and international economies, interest rates, competition, consumer confidence, disposable household income, and consumer spending may affect companies in this sector.

Consumer Staples. Changes in domestic and international economies, interest rates, competition, consumer confidence, consumer spending, government regulation, marketing, and supply and demand may affect companies in this sector.

Energy. Changes in supply and demand, the price of oil and gas, exploration and production spending, government regulation, world events, economic conditions, international politics, energy conservation, and the success of exploration projects may affect companies in this sector.

Financial Services. Changes in governmental regulation, interest rates, domestic and international economies, loan losses, price competition and industry consolidation may affect companies in this sector.

Healthcare. Companies in this sector are subject to litigation, intellectual property issues, competition, government regulation, product approval or rejection, and product obsolescence.

Materials and Processing. Changes in commodity prices, currency prices, import controls, supply and demand, economic cycles, worldwide competition, environmental liability, resource depletion, government regulation and labor disputes may affect companies in this sector.

Producer Durables. Changes in supply and demand, government regulation, world events, and economic conditions may affect companies in this sector.

Technology. Changes in domestic and international competition, economic cycles, financial resources, personnel availability, rapid innovation and intellectual property issues may affect companies in this sector.

Utilities. Changes in government regulation, price controls, financing costs, and competition may affect companies in this sector.

Investment Companies

Each Fund may invest in shares of other registered investment companies, including exchange-traded funds ("ETFs"), money market mutual funds and other mutual funds in pursuit of its investment objective, in accordance with the limitations established under the 1940 Act. This may include investments in money market mutual funds in connection with the Fund's management of daily cash positions. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, each Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear each Fund's proportionate share of the fees and expenses paid by shareholders of the other investment

company, in addition to the fees and expenses Fund shareholders directly bear in connection with the Funds' own operations.

Section 12(d)(1)(A) of the 1940 Act generally prohibits a fund from purchasing (1) more than 3% of the total outstanding voting stock of another fund; (2) securities of another fund having an aggregate value in excess of 5% of the value of the acquiring fund; and (3) securities of the other fund and all other funds having an aggregate value in excess of 10% of the value of the total assets of the acquiring fund. There are some exceptions, however, to these limitations pursuant to various rules promulgated by the SEC.

Foreign Investments

Each Fund may make investments in securities of non-U.S. issuers ("foreign securities"). The Funds reserve the right to invest up to 100% of its net assets in Depositary Receipts ("DRs"), U.S. dollar-denominated securities, foreign securities and securities of companies incorporated outside the U.S.

Depositary Receipts include American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs") or other forms of DRs. DRs are receipts typically issued in connection with a U.S. or foreign bank or trust company which evidence ownership of underlying securities issued by a non-U.S. company.

ADRs are depositary receipts for foreign securities denominated in U.S. dollars and traded on U.S. securities markets. These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. These are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institutions. Designed for use in U.S. securities markets, ADRs are alternatives to the purchase of the underlying securities in their national market and currencies. ADRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the depositary security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities.

Emerging Markets

The Funds may also invest in developing or emerging market securities. The considerations noted above regarding the risk of investing in foreign securities are generally more significant for investments in emerging or developing countries, such as countries in Eastern Europe, Latin America, South America or Southeast Asia. These countries may have relatively unstable governments and securities markets in which only a small number of securities trade. Markets of developing or emerging countries may generally be more volatile than markets of developed countries. Investment in these markets may involve significantly greater risks, as well as the potential for greater gains.

Risks of Investing in Foreign Securities

Investments in foreign securities involve certain inherent risks, including the following:

Political and Economic Factors. Individual economies of certain countries may differ favorably or unfavorably from the United States' economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the United States. Governments in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization, expropriation of goods or imposition of taxes,

and could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies and economic conditions of their trading partners. Enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

Legal and Regulatory Matters. Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, and less financial information available to issuers, than is available in the United States.

Currency Fluctuations. A change in the value of any foreign currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of an ADR's underlying portfolio securities denominated in that currency. Such changes will affect the Funds to the extent that the Funds are invested in ADRs comprised of foreign securities.

Foreign Taxes. The interest and dividends payable to a Fund on certain of the Funds' foreign securities may be subject to foreign taxes or withholding, thus reducing the net amount of income available for distribution to Fund shareholders. The Funds may not be eligible to pass through to its shareholders any tax credits or deductions with respect to such foreign taxes or withholding.

In considering whether to invest in the securities of a non-U.S. company, the Adviser considers such factors as the characteristics of the particular company, differences between economic trends and the performance of securities markets within the U.S. and those within other countries, and also factors relating to the general economic, governmental and social conditions of the country or countries where the company is located. The extent to which the Funds will be invested in non-U.S. companies, foreign countries and depositary receipts will fluctuate from time to time within any limitations described in the Prospectus, depending on the Adviser's assessment of prevailing market, economic and other conditions.

Short-Term, Temporary, and Cash Investments

The Funds may invest in any of the following securities and instruments:

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. The Funds may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Funds will be dollar denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government. If the Funds hold instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred by a fund that invests only in debt obligations of U.S. domestic issuers. See "Foreign Securities" above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located on interest income payable on the securities, the possible seizure or nationalization of foreign deposits, the possible establishment of exchange controls or the adoption of other foreign governmental restrictions which might adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower, and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Funds may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under its investment objectives and policies stated above and in its Prospectus, the Funds may make interest bearing time or other interest bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Funds may invest in certificates of deposit (interest bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short Term Notes and Other Corporate Obligations. The Funds may invest a portion of its assets in commercial paper and short term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short term notes will consist of issues rated at the time of purchase "A-2" or higher by Standard & Poor's ("S&P"), "Prime-1" by Moody's Investors Service, Inc. ("Moody's"), or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Adviser to be of comparable quality. These rating symbols are described in **Appendix A**.

Borrowing

Though the Funds do not currently intend to borrow money, the Funds are authorized to borrow money from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions, and not for the purpose of leveraging its investments, in amounts not to exceed at any time 33-1/3% of the value of its total assets at the time of such borrowings, as allowed under the 1940 Act. The use of borrowing by the Funds involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the NAV per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Funds did not borrow. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Funds might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

Cyber Security Risk

Investment companies, such as the Funds, and their service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting the Funds or the Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Funds. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Funds' ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Funds to regulatory fines or financial losses, and cause reputational damage. The Funds may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Funds invest, which could result in material adverse consequences for such issuers, and may cause the Funds' investment in such portfolio companies to lose value.

INVESTMENT RESTRICTIONS

The Trust (on behalf of the Funds) has adopted the following restrictions as fundamental policies, which may not be changed without the affirmative vote of the holders of a "majority of a Fund's outstanding voting securities" as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of each Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of a Fund.

The Funds' fundamental policies are as follows:

- (1) The Funds may not borrow money except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (2) The Funds may not engage in the business of underwriting the securities of other issuers except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (3) The Funds may lend money or other assets to the extent permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (4) The Funds may not issue senior securities except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (5) The Funds may not purchase or sell real estate except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.

(6) The Funds may purchase or sell commodities or contracts related to commodities to the extent permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.

(7) The Funds may not invest more than 25% of the market value of its total assets in the securities of companies engaged in any one industry. (Does not apply to investments in the securities of other investment companies or securities of the U.S. Government, its agencies or instrumentalities.)

Additional Information about Fundamental Investment Policies

The following provides additional information about the Funds' fundamental investment policies. This information does not form part of the Funds' fundamental investment policies.

With respect to the fundamental policy relating to borrowing money set forth in (1) above, the 1940 Act permits a fund to borrow money in amounts of up to one-third of the fund's total assets from banks for any purpose, and to borrow up to 5% of the fund's total assets from banks or other lenders for temporary purposes. To limit the risks attendant to borrowing, the 1940 Act requires a fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the fund's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Borrowing money to increase a fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of a fund's shares to be more volatile than if the fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of a fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, a fund may have to sell securities at a time and at a price that is unfavorable to the fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate a fund's net investment income in any given period. The policy in (1) above will be interpreted to permit the Funds to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act. Reverse repurchase agreements may be considered to be a type of borrowing. Short-term credits necessary for the settlement of securities transactions and arrangements with respect to securities lending will not be considered to be borrowings under the policy. Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy. Such trading practices may include futures, options on futures, forward contracts and other derivative investments.

With respect to the fundamental policy relating to underwriting set forth in (2) above, the 1940 Act does not prohibit a fund from engaging in the underwriting business or from underwriting the securities of other issuers; in fact, the 1940 Act permits a fund to have underwriting commitments of up to 25% of its assets under certain circumstances. Those circumstances currently are that the amount of a fund's underwriting commitments, when added to the value of the fund's investments in issuers where the fund owns more than 10% of the outstanding voting securities of those issuers, cannot exceed the 25% cap. A fund engaging in transactions involving the acquisition or disposition of portfolio securities may be considered to be an underwriter under the Securities Act of 1933, as amended (the "1933 Act"). Under the 1933 Act, an underwriter may be liable for material omissions or misstatements in an issuer's registration statement or prospectus. Securities purchased from an issuer and not registered for sale under the 1933 Act are considered restricted securities. There may be a limited market for these securities. If these securities are registered under the 1933 Act, they may then be eligible for sale but participating in the sale may subject the seller to underwriter liability. These risks could apply to a fund investing in restricted securities. Although it is not believed that the application of the 1933 Act provisions described above would cause a fund to be engaged in the business of underwriting, the policy in (2) above will be interpreted not to prevent the Funds from engaging in transactions involving the acquisition or disposition

of portfolio securities, regardless of whether the Funds may be considered to be an underwriter under the 1933 Act.

With respect to the fundamental policy relating to lending set forth in (3) above, the 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. (A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.) While lending securities may be a source of income to a fund, as with other extensions of credit, there are risks of delay in recovery or even loss of rights in the underlying securities should the borrower fail financially. However, loans would be made only when the Adviser believes the income justifies the attendant risks. In addition, collateral arrangements with respect to options, forward currency and futures transactions and other derivative instruments, as well as delays in the settlement of securities transactions, will not be considered loans.

With respect to the fundamental policy relating to issuing senior securities set forth in (4) above, “senior securities” are defined as fund obligations that have a priority over the fund’s shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits a fund from issuing senior securities except that the fund may borrow money in amounts of up to one-third of the fund’s total assets from banks for any purpose. A fund also may borrow up to 5% of the fund’s total assets from banks or other lenders for temporary purposes, and these borrowings are not considered senior securities. A fund also may issue preferred shares in accordance with the 1940 Act. The issuance of senior securities by a fund can increase the speculative character of the fund’s outstanding shares through leveraging. Leveraging of a fund’s portfolio through the issuance of senior securities magnifies the potential for gain or loss on monies, because even though the fund’s net assets remain the same, the total risk to investors is increased. Certain widely used investment practices that involve a commitment by a fund to deliver money or securities in the future are not considered by the SEC to be senior securities, provided that a fund segregates cash or liquid securities in an amount necessary to pay the obligation or the fund holds an offsetting commitment from another party. These investment practices include repurchase and reverse repurchase agreements, swaps, dollar rolls, options, futures and forward contracts. The policy in (4) above will be interpreted not to prevent collateral arrangements with respect to swaps, options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

With respect to the fundamental policy relating to real estate set forth in (5) above, the 1940 Act does not prohibit a fund from owning real estate. Investing in real estate may involve risks, including that real estate is generally considered illiquid and may be difficult to value and sell. Owners of real estate may be subject to various liabilities, including environmental liabilities. The policy in (5) above will be interpreted not to prevent the Funds from investing in real estate-related companies, companies whose businesses consist in whole or in part of investing in real estate, instruments (like mortgages) that are secured by real estate or interests therein, or real estate investment trust securities.

With respect to the fundamental policy relating to commodities set forth in (6) above, the 1940 Act does not prohibit a fund from owning commodities, whether physical commodities and contracts related to physical commodities (such as oil or grains and related futures contracts), or financial commodities and contracts related to financial commodities (such as currencies and, possibly, currency futures). If a fund were to invest in a physical commodity or a physical commodity-related instrument, the fund would be subject to the additional risks of the particular physical commodity and its related market. The value of commodities and commodity-related instruments may be extremely volatile and may be affected either directly or indirectly by a variety of factors. There also may be storage charges and risks of loss

associated with physical commodities. The policy in (6) above will be interpreted to permit investments in exchange traded funds that invest in physical and/or financial commodities.

The Funds' fundamental policies are written and will be interpreted broadly. For example, the policies will be interpreted to refer to the 1940 Act and the related rules as they are in effect from time to time, and to interpretations and modifications of or relating to the 1940 Act by the SEC and others as they are given from time to time. When a policy provides that an investment practice may be conducted as permitted by the 1940 Act, the policy will be interpreted to mean either that the 1940 Act expressly permits the practice or that the 1940 Act does not prohibit the practice.

Non-Fundamental Investment Policies

The Funds observe the following policies, which are not deemed fundamental and which may be changed without shareholder vote. The Funds may not:

1. Invest in any issuer for purposes of exercising control or management.
2. Hold, in the aggregate, more than 15% of its net assets in illiquid securities.

PORTFOLIO TURNOVER

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and generally reflects a greater number of taxable transactions. High portfolio turnover may result in larger amounts of short-term capital gains which, when distributed to shareholders, are generally taxed at ordinary income tax rates. During the fiscal period August 31, 2015 through June 30, 2016, the Growth Fund's portfolio turnover was 15% of the average value of its portfolio and the Genea Fund's portfolio turnover was 19% of the average value of its portfolio.

PORTFOLIO HOLDINGS POLICY

The Funds maintain portfolio holdings disclosure policies that govern the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by each Fund. These portfolio holdings disclosure policies have been approved by the Board. Disclosure of each Fund's complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the annual report and semi-annual report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov.

Pursuant to the Trust's portfolio holdings disclosure policies, non-public information about a Fund's portfolio holdings generally is not distributed to any person, unless by explicit agreement or by virtue of their respective duties to the Fund, such persons are required to maintain the confidentiality of the information disclosed and have a duty not to trade on non-public information. Examples of disclosure by the Trust include instances in which:

- The disclosure is required pursuant to a regulatory request, court order or is legally required in the context of other legal proceedings;
- The disclosure is made to a mutual fund rating and/or ranking organization, or person performing similar functions;
- The disclosure is made to internal parties involved in the investment process, administration, operation or custody of a Fund, including, but not limited to the Funds' administrator, U.S. Bancorp Fund Services, LLC ("USBFS") and the Trust's Board of Trustees, attorneys, auditors or accountants;
- The disclosure is made: (a) in connection with a quarterly, semi-annual or annual report that is available to the public; or (b) relates to information that is otherwise available to the public; or
- The disclosure is made with the prior written approval of either the Trust's Chief Compliance Officer or his or her designee.

Certain of the persons listed above receive information about a Fund's portfolio holdings on an ongoing basis without lag as part of the normal investment activities of the Fund. The Funds believe that these third parties have legitimate objectives in requesting such portfolio holdings information and operate in the best interest of a Fund's shareholders. These persons include internal parties involved in the investment process, administration, operation or custody of the Funds, specifically: USBFS; the Trust's Board; and the Trust's attorneys and accountants (currently, Morgan, Lewis & Bockius LLP and BBD, LLP, respectively), all of which typically receive such information after it is generated. In no event shall the Adviser, its affiliates or employees, the Funds, or any other party receive any direct or indirect compensation in connection with the disclosure of information about a Fund's holdings.

Any disclosures to additional parties not described above is made with the prior written approval of either the Trust's Chief Compliance Officer or his or her designee, pursuant to the Trust's Policy on Disclosure of Portfolio Holdings.

The Chief Compliance Officer or designated officer of the Trust will approve the furnishing of non-public portfolio holdings to a third party only if they consider the furnishing of such information to be in the best interest of a Fund and its shareholders and if no material conflict of interest exists regarding such disclosure between shareholders interest and those of the Adviser, Distributor or any affiliated person of the Fund. No consideration may be received by the Funds, the Adviser, any affiliate of the Adviser or their employees in connection with the disclosure of portfolio holdings information. The Board receives and reviews annually a list of the persons who receive non-public portfolio holdings information and the purpose for which it is furnished.

MANAGEMENT

The overall management of the Trust's business and affairs is invested with its Board. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Adviser, Administrator, Custodian and Transfer Agent, each as defined below. The day-to-day operations of the Trust are delegated to its officers, subject to the Funds' investment objective, strategies and policies and to the general supervision of the Board. The Trustees and officers of the Trust, their ages, birth dates, and positions with the Trust, terms of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held are set forth in the table below.

Name, Address and Age	Position(s) Held with Trust	Term of Office⁽¹⁾ and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex⁽²⁾ Overseen by Trustee	Other Directorships Held During Past 5 Years by Trustee⁽³⁾
Independent Trustees⁽⁴⁾					
John C. Chrystal 615 E. Michigan St. Milwaukee, WI 53202 Year of birth: 1958	Trustee	Since 2011	Founder and Managing Partner of Bent Gate Advisors, LLC, a consulting firm that provides strategic advice and assistance to financial institutions. Previously a Partner at DiMaio Ahmad Capital, an investment management firm.	2	Director, Javelin Mortgage Investments, Inc.; Director, The Bancorp, Inc.; Trustee, Trust for Advised Portfolios (for series not affiliated with the Funds).
Albert J. DiUlio, S.J. 615 E. Michigan St. Milwaukee, WI 53202 Year of birth: 1943	Trustee	Since 2011	Treasurer, Midwest Province and Wisconsin Province of The Society of Jesus (2014 to present); President Vatican Observatory Foundation (2011 – 2014). Previously, served five years as Secretary for Finance and Higher Education USA Jesuit Conference, followed by a one year Sabbatical.	2	Trustee, Trust for Advised Portfolios (for series not affiliated with the Funds).
David S. Krause 615 E. Michigan St. Milwaukee, WI 53202 Year of birth: 1954	Trustee	Since 2011	Director of the Applied Investment Management program and Adjunct Assistant Professor of Finance at Marquette University.	2	Trustee, Trust for Advised Portfolios (for series not affiliated with the Funds).
Harry E. Resis 615 E. Michigan St. Milwaukee, WI 53202 Year of birth: 1945	Trustee	Since 2012	Private investor. Previously served as Director of US Fixed Income for Henderson Global Investors.	2	Trustee, Trust for Advised Portfolios (for series not affiliated with the Funds).

Russell B. Simon 615 E. Michigan Street Milwaukee, WI 53202 Year of birth: 1980	Treasurer and Principal Financial Officer	Since 2014	Vice President, U.S. Bancorp Fund Services, LLC, (2011 to present); Senior Fund Administrator, Huntington Asset Services (2002 to 2011).
Eric W. Pinciss, Esq. 615 E. Michigan Street Milwaukee, WI 53202 Year of birth: 1975	Secretary	Since 2015	Vice President, U.S. Bancorp Fund Services, LLC (2012 to present); Contract Attorney, various law firms (2009-2012).

⁽¹⁾ Each Trustee serves an indefinite term until the election of a successor. Each officer serves an indefinite term until the election of a successor.

⁽²⁾ The Trust is comprised of numerous series managed by unaffiliated investment advisers. The term “Fund Complex” applies to the Zevenbergen Growth Fund and Zevenbergen Genea Fund (the “Zevenbergen Funds”). The Funds do not hold themselves out as related to any other series within the Trust for purposes of investment and investor services, nor do they share the same investment advisor with any other series.

⁽³⁾ “Other Directorships Held” includes only directorships of companies required to register or file reports with the SEC under the Securities Exchange Act of 1934, as amended, (that is, “public companies”) or other investment companies registered under the 1940 Act.

⁽⁴⁾ The Trustees of the Trust who are not “interested persons” of the Trust as defined under the 1940 Act (“Independent Trustees”).

⁽⁵⁾ Mr. Martin is an “interested person” of the Trust as defined by the 1940 Act. Mr. Martin is an interested Trustee of the Trust by virtue of the fact that he is an interested person of Quasar Distributors, LLC, the Trust’s distributor.

Additional Information Concerning Our Board of Trustees

Board Leadership Structure

The Board has general oversight responsibility with respect to the operation of the Trust and the Funds. The Board has engaged the Adviser to manage the Funds and is responsible for overseeing the Adviser and other service providers to the Trust and the Funds in accordance with the provisions of the 1940 Act and other applicable laws. The Board has established an Audit Committee to assist the Board in performing its oversight responsibilities.

Given the fact there is only a small number of funds in the Trust, the Trust does not have a Chairman of the Board, nor does the Trust have a lead disinterested trustee. The Trust has determined that its leadership structure is appropriate in light of, among other factors, the asset size and nature of the Trust, the arrangements for the conduct of the Trust’s operations, the number of Trustees, and the responsibilities of the Board.

Board Oversight of Risk

Through its direct oversight role, and indirectly through the Audit Committee, and officers of the Funds’ and service providers, the Board performs a risk oversight function for the Funds. To effectively perform its risk oversight function, the Board, among other things, performs the following activities: receives and reviews reports related to the performance and operations of the Funds; reviews and approves, as applicable, the compliance policies and procedures of the Funds; approves the Funds’ principal investment policies; adopts policies and procedures designed to deter market timing; meets with representatives of various service providers, including the Adviser, to review and discuss the activities of the Funds and to provide direction with respect thereto; and appoints a chief compliance officer of the Funds who oversees the implementation and testing of the Funds’ compliance program and reports to the Board regarding compliance matters for the Funds and its service providers.

The Trust has an Audit Committee, which plays a significant role in the risk oversight of the Fund as it meets annually with the auditors of the Funds. The Board also meets quarterly with the Funds’ chief compliance officer.

Not all risks that may affect the Funds can be identified nor can controls be developed to eliminate or mitigate their occurrence or effects. It may not be practical or cost effective to eliminate or mitigate certain risks, the processes and controls employed to address certain risks may be limited in their effectiveness, and some risks are simply beyond the reasonable control of the Adviser or other service providers. Moreover, it is necessary to bear certain risks (such as investment-related risks) to achieve each Fund’s goals. As a result of the foregoing and other factors, the Funds’ ability to manage risk is subject to substantial limitations.

Trust Committees. The Trust has three standing committees: the Audit Committee, which also serves as the Qualified Legal Compliance Committee (“QLCC”), the Governance and Nominating Committee (the “Nominating Committee”), and the Valuation Committee.

The members of the Audit Committee are Messrs. Chrystal, DiUlio, Krause and Resis each of whom is an Independent Trustee. The primary functions of the Audit Committee are to select the independent registered public accounting firm to be retained to perform the annual audit of the Funds, to review the results of the audit, to review the Funds’ internal controls, to approve in advance all permissible non-audit services performed by the independent auditors and to review certain other matters relating to the Funds’

independent registered public accounting firm and financial records. In its role as the QLCC, its function is to receive reports from an attorney retained by the Trust of evidence of a material violation by the Trust or by any officer, director, employee or agent of the Trust. During the fiscal period August 31, 2015 through June 30, 2016, the Audit Committee met three times in regards to the Funds.

The Nominating Committee, comprised entirely of the Independent Trustees, is responsible for seeking and reviewing candidates for consideration as nominees for Trustees and meets only as necessary. The Nominating Committee will consider nominees nominated by shareholders. Recommendations by shareholders for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed Nominee, and such recommendation must comply with the notice provisions set forth in the Trust By-Laws. In general, to comply with such procedures, such nominations, together with all required biographical information, must be delivered to and received by the President of the Trust at the principal executive offices of the Trust not later than 120 days and no more than 150 days prior to the shareholder meeting at which any such nominee would be voted on. During the fiscal period August 31, 2015 through June 30, 2016, the Nominating Committee did not meet in regards to the Funds.

The Board has delegated day-to-day valuation issues to a Valuation Committee that is comprised of the Trust's President, Treasurer and Assistant Treasurers and is overseen by the Trustees. The function of the Valuation Committee is to review each investment adviser's valuation of securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by each adviser, and the Valuation Committee gathers and reviews Fair Valuation Forms that are completed by an adviser to support its determinations, and which are subsequently reviewed and ratified by the Board. During the fiscal period August 31, 2015 through June 30, 2016, the Valuation Committee met three times in regards to the Funds.

Board Oversight of Risk Management. As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets regularly with the Chief Compliance Officer to discuss compliance and operational risks. The Audit Committee also meets with the Treasurer and the Trust's independent public accounting firm to discuss, among other things, the internal control structure of the Trust's financial reporting function. The full Board receives reports from the Adviser and Portfolio Managers as to investment risks as well as other risks that may be also discussed in Audit Committee.

Information about Each Trustee's Qualification, Experience, Attributes or Skills. In addition to the information provided in the table above, below is certain additional information concerning each particular Trustee and certain of their Trustee Attributes. The information provided below, and in the table above, is not all-inclusive. Many Trustee attributes involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

John Chrystal's experience as a partner of an investment management firm, and his experience as a partner of a consulting firm advising financial institutions, has provided him with an extensive knowledge of the highly regulated financial services industry, which knowledge he brings to the Board in a relatable, effective way.

Albert J. DiUlio, S.J.'s financing background, combined with his work experience, have provided him with a strong understanding of financial statements and experience addressing the complex issues that confront entities. As a trustee, Mr. DiUlio uses his financial background and experiences to enhance Board discussions with useful information and insights.

David S. Krause's experience co-founding small businesses and as a professor in a graduate management program has honed his understanding of financial statements and the complex issues that confront businesses, making him a valuable resource to the Board.

Harry Resis' background in fixed income securities analysis, with an emphasis on high yield securities, provides him with a practical knowledge of the underlying markets and strategies used by Funds in the Trust that will be useful to the Board in their analysis and oversight of the Funds.

Ian Martin has substantial mutual fund operations and shareholder servicing experience through his position as Executive Vice President and Director of Transfer Agent Operations of U.S. Bancorp Fund Services, LLC, a full service provider to mutual funds, which makes him a valuable resource to the Board as they contemplate shareholder servicing needs.

Each of Messrs. Chrystal, DiUlio, Krause, Resis and Martin takes a conservative and thoughtful approach to addressing issues facing the Fund. The combination of skills and attributes discussed above led to the conclusion that each of Messrs. Chrystal, DiUlio, Krause, Resis and Martin should serve as a trustee.

Trustee Ownership of Fund Shares and Other Interests

No Trustee owned shares of the Funds as of the calendar year ended December 31, 2015.

As of December 31, 2015, neither the Independent Trustees nor members of their immediate family, own securities beneficially or of record in the Adviser, the Distributor, as defined below, or an affiliate of the Adviser or Distributor. Accordingly, neither the Independent Trustees nor members of their immediate family, have direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have conducted any transactions (or series of transactions) in which the amount involved exceeds \$120,000 and to which the Adviser, the Distributor or any affiliate thereof was a party.

Compensation

Set forth below is the compensation received by the Independent Trustees from the Funds for the fiscal period August 31, 2015 through June 30, 2016. The Independent Trustees receive an annual retainer of \$20,000 per year and a fee of \$1,000 for each meeting of the Board of Trustees attended, including special meetings allocated among each of the various portfolios comprising the Trust. The Trustees also receive reimbursement from the Trust for expenses incurred in connection with attendance at meetings. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

Name of Independent Trustee	Aggregate Compensation from the Zevenbergen Growth Fund	Aggregate Compensation from the Zevenbergen Genea Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Annual Benefits Upon Retirement	Total Compensation from Fund Complex Paid to Trustees ⁽¹⁾
John Chrystal	\$2,000	\$2,000	None	None	\$4,000
Albert J. DiUlio, S.J.	\$2,000	\$2,000	None	None	\$4,000
David S. Krause	\$2,000	\$2,000	None	None	\$4,000
Harry Resis	\$2,000	\$2,000	None	None	\$4,000
Name of Interested Trustee					
Ian Martin	\$0	\$0	None	None	\$0

⁽¹⁾ There are currently multiple portfolios comprising the Trust. The term “Fund Complex” applies only to the Zevenbergen Funds. For the fiscal year ended June 30, 2016, Trustees’ fees were in the amount of \$96,000.

CODES OF ETHICS

The Trust, the Adviser and the Distributor, as defined below, have each adopted separate Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, access persons of the Adviser and Distributor to invest in securities that may be purchased or held by the Fund.

PROXY VOTING POLICIES AND PROCEDURES

The Board has adopted Proxy Voting Policies and Procedures (the “Policies”) on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, subject to the Board’s continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Funds and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser’s Policies and a record of each proxy voted by the Adviser on behalf of each Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

A copy of the Adviser’s policies and procedures used to determine how to vote proxies related to portfolio securities can be found in **Appendix B**.

The Trust is required to file a Form N-PX, with each Fund’s complete proxy voting record for the 12 months ended June 30, no later than August 31 of each year. A Fund’s proxy voting record will be available without charge, upon request, by calling toll-free 1-844-ZVNBGRN (1-844-986-2746) and on the SEC’s website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

A principal shareholder is any person who owns of record or beneficially 5% or more of any Class of a Fund’s outstanding securities. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of a Fund.

As of October 4, 2016, the following shareholders were considered to be principal shareholders of the Funds.

Zevenbergen Growth Fund – Investor Class		
Name and Address	% Ownership	Type of Ownership
ZEVENBERGEN CAPITAL INVESTMENTS LLC 601 UNION ST STE 4600 SEATTLE WA 98101	54.84%	Record
CHARLES SCHWAB & CO INC 211 MAIN ST SAN FRANCISCO CA 94105	45.16%	Record
Zevenbergen Growth Fund – Institutional Class		
Name and Address	% Ownership	Type of Ownership
CHARLES SCHWAB & CO INC 211 MAIN ST SAN FRANCISCO CA 94105	97.57%	Record
Zevenbergen Genea Fund – Investor Class		
Name and Address	% Ownership	Type of Ownership
CHARLES SCHWAB & CO INC 211 MAIN ST SAN FRANCISCO CA 94105	50.23%	Record
KAY SMITH BLUM 601 UNION ST STE 4600 SEATTLE WA 98101	20.01%	Beneficial
PIERRE SUNDBORG & JEAN SUNDBORG 601 UNION ST STE 4600 SEATTLE WA 98101	16.98%	Beneficial
ESME D FREEDMAN & BART J FREEDMAN 601 UNION ST STE 4600 SEATTLE WA 98101	6.50%	Beneficial
ZEVENBERGEN CAPITAL INVESTMENTS LLC 601 UNION ST STE 4600 SEATTLE WA 98101	6.28%	Record

Zevenbergen Genea Fund – Institutional Class		Type of
Name and Address	% Ownership	Ownership
CHARLES SCHWAB & CO INC 211 MAIN ST SAN FRANCISCO CA 94105	74.82%	Record
KATHY J WILLIAMS 601 UNION ST STE 4600 SEATTLE WA 98101	21.30%	Beneficial

As of October 1, 2016, the Trustees and Officers of the Trust, as a group, beneficially owned less than 1% of the outstanding shares of any class of a Fund.

THE FUNDS' INVESTMENT ADVISER

Zevenbergen Capital Investments LLC, located at 601 Union Street, Suite 4600, Seattle, WA 98101, acts as investment adviser to the Funds pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust. evenstar3 inc., a Washington state corporation wholly-owned by Nancy Zevenbergen, located at 601 Union Street, Suite 4600, Seattle, WA 98101, holds greater than 25% of the profits interest of the Adviser and is therefore a control person of the Adviser.

In consideration of the services to be provided by the Adviser pursuant to the Advisory Agreement, the Zevenbergen Growth Fund pays the Adviser a monthly management fee that is calculated at the annual rate of 0.80% of the Fund's average daily net assets, and the Zevenbergen Genea Fund pays the Adviser a monthly management fee that is calculated at the annual rate of 0.90% of the Fund's average daily net assets.

The following tables describe the advisory fees paid to the Adviser by the Funds during the periods indicated.

Growth Fund	Advisory Fee Accrued	Fee Waiver and Expense Reimbursement	Net Advisory Fees Paid
Fiscal period August 31, 2015 through June 30, 2016	\$10,866	\$191,988	\$0

Genea Fund	Advisory Fee Accrued	Fee Waiver and Expense Reimbursement	Net Advisory Fees Paid
Fiscal period August 31, 2015 through June 30, 2016	\$14,860	\$195,848	\$0

After its initial two year term, the Advisory Agreement continues in effect for successive annual periods so long as such continuation is specifically approved at least annually by the vote of (1) the Board (or a majority of the outstanding shares of the Funds), and (2) a majority of the Trustees who are not interested persons of any party to the Advisory Agreement, in each case, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement may be terminated at any time, without

penalty, by either party to the Advisory Agreement upon a 60-day written notice and is automatically terminated in the event of its “assignment,” as defined in the 1940 Act.

In addition to the management fees payable to the Adviser, the Funds are responsible for their own operating expenses, including: fees and expenses incurred in connection with the issuance, registration and transfer of its shares; brokerage and commission expenses; all expenses of transfer, receipt, safekeeping, servicing and accounting for the cash, securities and other property of the Trust for the benefit of the Funds including all fees and expenses of its custodian and accounting services agent; interest charges on any borrowings; costs and expenses of pricing and calculating its daily NAV per share and of maintaining its books of account required under the 1940 Act; taxes, if any; a pro rata portion of expenditures in connection with meetings of the Funds’ shareholders and the Trust’s Board that are properly payable by the Funds; salaries and expenses of officers and fees and expenses of members of the Board or members of any advisory board or committee who are not members of, affiliated with or interested persons of the Adviser or Administrator; insurance premiums on property or personnel of the Funds which inure to their benefit, including liability and fidelity bond insurance; the cost of preparing and printing reports, proxy statements, prospectuses and the statement of additional information of the Funds or other communications for distribution to existing shareholders; legal counsel, auditing and accounting fees; trade association membership dues (including membership dues in the Investment Company Institute allocable to each Fund); fees and expenses (including legal fees) of registering and maintaining registration of its shares for sale under federal and applicable state and foreign securities laws; all expenses of maintaining shareholder accounts, including all charges for transfer, shareholder recordkeeping, dividend disbursing, redemption, and other agents for the benefit of the Funds, if any; and all other charges and costs of its operation plus any extraordinary and non-recurring expenses, except as otherwise prescribed in the Advisory Agreement.

Though each Fund is responsible for its own operating expenses, the Adviser has contractually agreed to waive a portion or all of the management fees payable to it by the Funds and/or to pay the Funds’ operating expenses to the extent necessary to limit the Fund’s aggregate annual operating expenses (excluding shareholder servicing fees, acquired fund fees and expenses, interest, taxes and extraordinary expenses) to the limits set forth in the Annual Fund Operating Expenses table of the Prospectus. Any such waivers made by the Adviser in its management fees or payment of expenses which are the Funds’ obligation are subject to recoupment by the Adviser from the Funds, if so requested by the Adviser, in subsequent fiscal years if the aggregate amount actually paid by the Funds toward the operating expenses for such fiscal year (taking into account the recoupment) does not exceed the applicable limitation on each Fund’s expenses. The Adviser is permitted to recoup only for management fee waivers and expense payments made in the previous three fiscal years. Any such recoupment is also contingent upon the Board’s subsequent review and ratification of the recouped amounts. Such recoupment may not be paid prior to each Fund’s payment of current ordinary operating expenses.

PORTFOLIO MANAGERS

Nancy Zevenbergen, CFA, CIC, Brooke de Boutray, CFA, CIC, and Leslie Tubbs, CFA, CIC are the Portfolio Managers principally responsible for the day-to-day management of the Funds’ portfolio. Joseph Dennison, CFA and Anthony Zackery, CFA are the Associate Portfolio Managers that support ZCI’s Portfolio Managers with active recommendations on security selection and portfolio construction through original research.

The following table shows the number of other accounts managed by each Portfolio Manager and each Associate Portfolio Manager and the total assets in the accounts managed within various categories as of June 30, 2016.

Nancy Zevenbergen, CFA, CIC			Number of Accounts with Advisory Fee based on	
Type of Accounts	Number of Accounts	Total Assets	Performance	Total Assets
Registered Investment Companies	1	\$23.90 million	0	0
Other Pooled Investments	0	0	0	0
Other Accounts	117	\$1,574.22 million	1	\$575.57 million

Material Conflicts of Interest.

ZCI currently provides investment advisory services to a client whereby ZCI is compensated (in part) by the investment performance of the client's account (performance fee). ZCI also provides investment advisory services to certain accounts of, or related to, employees and/or their family members. ZCI has procedures in place to ensure that the accounts described above are not shown preferential treatment over other accounts in the allocation of investments. ZCI's compliance staff conducts quarterly testing of these procedures to ensure their continued effectiveness. These procedures are more fully described in ZCI's Trading, Best Execution and Directed Brokerage and IPO Allocation Policy.

To address and manage these potential conflicts of interest, the Adviser has adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of its clients is treated on a fair and equitable basis. Such policies and procedures include, but are not limited to, investment and trade aggregation and allocation policies and oversight by the Adviser's compliance team.

Compensation. ZCI compensates Portfolio Managers and Associate Portfolio Managers with salaries reflective of their individual experience and commensurate with industry standards and those of regional competitors. In addition to salaries, portfolio managers receive additional compensation (either through annual incentive payments or as a result of ownership interests in ZCI) based on the firm's collective effort to drive revenue and profit growth through 1) working in the best interest of clients by delivering superior investment performance, 2) concentrating on stellar service to ensure client retention, and 3) effectively marketing to garner new clients.

OTHER SERVICE PROVIDERS

Fund Administrator, Transfer Agent and Fund Accountant

Pursuant to an administration agreement (the "Administration Agreement"), U.S. Bancorp Fund Services, LLC ("USBFS"), 615 East Michigan Street, Milwaukee, Wisconsin 53202, acts as the administrator to the Funds. USBFS provides certain services to the Funds including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds' independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Funds with applicable laws and regulations, excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Funds, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, USBFS does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares.

Pursuant to the Administration Agreement, as compensation for its fund administration, portfolio compliance and fund accounting services, USBFS receives from the Funds, a fee based on each Fund's current average daily net assets of 8 basis points on the first \$250 million, 6 basis points on the next \$250 million, 5 basis points on the balance and with a minimum annual fee of \$78,000 for the first fund and \$60,000 for the second fund. USBFS also is entitled to certain out-of-pocket expenses. USBFS also acts as fund accountant, transfer agent (the "Transfer Agent") and dividend disbursing agent under separate agreements. Additionally, the Administrator provides Chief Compliance Officer services to the Trust under a separate agreement. The cost of the Chief Compliance Officer's services is charged to the Funds and approved by the Board annually.

The following tables describe the fees paid by the Funds to USBFS during the periods indicated.

Custodian

Pursuant to a Custody Agreement between the Trust and U.S. Bank National Association, located at 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212 (the "Custodian"), the Custodian serves as the custodian of the Funds' assets, holds the Funds' portfolio securities in safekeeping, and keeps all necessary records and documents relating to its duties. The Custodian is compensated with an asset-based fee plus transaction fees and is reimbursed for out-of-pocket expenses.

The Custodian and Administrator do not participate in decisions relating to the purchase and sale of securities by the Funds. The Administrator, Transfer Agent, Custodian and the Fund's Distributor (as defined below) are affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Funds may invest.

Independent Registered Public Accounting Firm

BBD, LLP, 1835 Market Street, 26th Floor, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Funds, whose services include auditing the Funds' financial statements and the performance of related tax services.

Legal Counsel

Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue NW, Washington, DC 20004, serves as legal counsel to the Trust.

EXECUTION OF PORTFOLIO TRANSACTIONS

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute each Fund's portfolio transactions. Purchases of portfolio securities for the Funds also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) which specialize in the types of securities which the Funds will be holding, unless better executions are available elsewhere.

In placing portfolio transactions, the Adviser will seek best execution. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Agreement with the Funds, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Funds subject to rules adopted by the Financial Industry Regulatory Authority, Inc. ("FINRA") and the SEC.

While it is the Funds' general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Funds, in accordance with Section 28(e) under the Securities and Exchange Act of 1934, when it is determined that more than one broker can deliver best execution, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Funds or to the Adviser, even if the specific services are not directly useful to the Funds and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Funds may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer.

Investment decisions for the Funds are made independently from those of other client accounts or mutual funds managed or advised by the Adviser. Nevertheless, it is possible that at times identical securities will be acceptable for both the Funds and one or more of such client accounts or mutual funds. In such event, the position of the Funds and such client account(s) or mutual funds in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts or mutual funds seek to acquire the same security as the Funds at the same time, the Funds may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Funds may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts or mutual funds simultaneously purchases or sells the same security that a Fund is purchasing or selling, each day's transactions in such security will be allocated between that Fund and all such client accounts or mutual funds in a manner deemed fair and reasonable by the Adviser, taking into account the respective sizes of the accounts and the amount of cash available for investment, the investment objective of the account, and the ease with which a client's appropriate amount can be bought, as well as the liquidity and volatility of the account and the urgency involved in making an investment decision for the client. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Funds are concerned. In other cases, however, it is believed that the ability of the Funds to participate in volume transactions may produce better executions for the Funds.

The following tables describe the brokerage commissions paid by the Funds during the periods indicated.

Growth Fund

Fiscal period August 31, 2015 through June 30, 2016	\$1,623

GENERAL INFORMATION

The Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest and to divide or combine the shares into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in a Fund. Each share represents an interest in a Fund proportionately equal to the interest of each other share. Upon a Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

With respect to the Funds, the Trust may offer more than one class of shares. The Trust reserves the right to create and issue additional series or classes. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class. Currently, each of the Funds offers two share classes – Investor Class shares and Institutional Class shares.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Trustees, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more Trustees. Shareholders also have, in certain circumstances, the right to remove one or more Trustees without a meeting. No material amendment may be made to the Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment. The Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a Shareholder Servicing Agent may vote any shares as to which such Shareholder Servicing Agent is the agent of record and which are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such Shareholder Servicing Agent is the agent of record. Any shares so voted by a Shareholder Servicing Agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

The Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, Trustees, officers, employees and agents covering possible tort and other liabilities. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust itself was unable to meet its obligations.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a “majority” (as defined in the Rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of Fund shares.

How to Buy Shares

You may purchase shares of the Funds from securities brokers, dealers or financial intermediaries (collectively, “Financial Intermediaries”). Investors should contact their Financial Intermediary directly for appropriate instructions, as well as information pertaining to accounts and any service or transaction fees that may be charged. The Funds may enter into arrangements with certain Financial Intermediaries whereby such Financial Intermediaries are authorized to accept your order on behalf of the Fund. If you transmit your order to these Financial Intermediaries before the close of regular trading (generally 4:00 p.m., Eastern Time) on a day that the NYSE is open for business, shares will be purchased at the appropriate per share price next computed after it is received by the Financial Intermediary. Investors should check with their Financial Intermediary to determine if it participates in these arrangements.

The public offering price of Fund shares is the NAV per share. Shares are purchased at the public offering price next determined after the Transfer Agent receives your order in good order (*i.e.*, the written request contains your account number, states whether you want all or some of your shares redeemed, and is signed by all of the shareholders whose names appear on the account registration). In most cases, in order to receive that day’s public offering price, the Transfer Agent must receive your order in good order before the close of regular trading on the New York Stock Exchange (“NYSE”), normally 4:00 p.m., Eastern Time.

The Trust reserves the right in its sole discretion (i) to suspend the continued offering of a Fund’s shares and (ii) to reject purchase orders in whole or in part when in the judgment of the Adviser or the Distributor such rejection is in the best interest of the Fund. The Adviser has the right to reduce or waive the minimum for initial and subsequent investments for certain fiduciary accounts or under circumstances where certain economies can be achieved in sales of the Fund’s shares.

In addition to cash purchases, Fund shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy Fund shares must be readily marketable, their acquisition consistent with the Fund’s objective and otherwise acceptable to the Adviser and the Board.

How to Sell Shares and Delivery of Redemption Proceeds

You can sell your Fund shares any day the NYSE is open for regular trading, either directly to the Fund or through your Financial Intermediary.

Payments to shareholders for shares of the Funds redeemed directly from the Funds will be made as promptly as possible, but no later than seven days after receipt by the Transfer Agent of the written request in proper form, with the appropriate documentation as stated in the Prospectus, except that the Funds may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC making disposal of portfolio securities or valuation of net assets of the Funds not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of the Fund's shareholders. Under unusual circumstances, the Funds may suspend redemptions, or postpone payment for more than seven days, but only as authorized by SEC rules.

The value of shares on redemption or repurchase may be more or less than the investor's cost, depending upon the market value of the Fund's portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem Fund shares by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder, the Funds or its authorized agents may carry out the instructions and/or respond to the inquiry consistent with the shareholder's previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, the Funds and its agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

USBFS will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If USBFS fails to employ reasonable procedures, the Funds and USBFS may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, to the extent permitted by applicable law, neither the Funds nor its agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact USBFS.

Redemptions In-Kind

The Funds have reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV per share for the shares being sold. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

The Funds do not intend to hold any significant percentage of its portfolio in illiquid securities, although the Funds, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Funds were to elect to make an in-kind redemption, the Funds expect that they would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Funds held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Funds may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Funds do not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such

securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

DETERMINATION OF SHARE PRICE

The NAV of the Funds is determined as of the close of regular trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m., Eastern Time), each day the NYSE is open for trading. However, a Fund's NAV may be calculated earlier if trading on the NYSE is restricted or as permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. It is expected that the NYSE will not be open for trading on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday/Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV will not be calculated on days when the NYSE is closed for trading.

NAV is calculated by adding the value of all securities and other assets attributable to the Funds (including interest and dividends accrued, but not yet received), then subtracting liabilities attributable to the Funds (including accrued expenses).

Generally, the Funds' investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Funds' Adviser with oversight by the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Adviser considers, among other things: (1) the last sales price on the securities exchange, if any, on which a security is primarily traded; (2) the mean between the bid and asked prices; (3) price quotations from an approved pricing service; and (4) other factors as necessary to determine a fair value under certain circumstances.

Securities primarily traded in the NASDAQ Global Market[®] for which market quotations are readily available shall be valued using the NASDAQ[®] Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. OTC securities which are not traded in the NASDAQ Global Market[®] shall be valued at the most recent sales price. Securities and assets for which market quotations are not readily available (including restricted securities which are subject to limitations as to their sale) are valued at fair value as determined in good faith under procedures approved by or under the direction of the Board.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above

A Fund's securities, including ADRs, EDRs and GDRs, which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and asked price. Securities that are traded on more than one exchange are valued on the exchange determined by the Adviser to be the primary market.

In the case of foreign securities, the occurrence of certain events after the close of foreign markets, but prior to the time a Fund's NAV is calculated (such as a significant surge or decline in the U.S. or other markets) often will result in an adjustment to the trading prices of foreign securities when foreign markets open on the following business day. If such events occur, the Funds will value foreign securities at fair

value, taking into account such events, in calculating the NAV. In such cases, use of fair valuation can reduce an investor's ability to seek to profit by estimating the Fund's NAV in advance of the time the NAV is calculated. The Adviser anticipates that the Fund's portfolio holdings will be fair valued only if market quotations for those holdings are considered unreliable or are unavailable.

An option that is written or purchased by the Funds shall be valued using composite pricing via the National Best Bid and Offer quotes. Composite pricing looks at the last trade on the exchange where the option is traded. If there are no trades for an option on a given business day, as of closing, the Funds will value the option at the mean of the highest bid price and lowest ask price across the exchanges where the option is traded. For options where market quotations are not readily available, fair value shall be determined by the Funds' Adviser with oversight by the Trust's Valuation Committee.

All other assets of the Funds are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

DISTRIBUTIONS AND TAX INFORMATION

Distributions

Dividends from net investment income and distributions from net profits from the sale of securities are generally made semi-annually. Also, the Funds typically distribute any undistributed net investment income on or about December 31 of each year. Any net capital gains realized through the period ended October 31 of each year will also be distributed by December 31 of each year.

Each distribution by the Funds is accompanied by a brief explanation of the form and character of the distribution. In January of each year, the Funds will issue to each shareholder a statement of the amount and federal income tax status of all distributions.

Tax Information

The following is only a summary of certain additional U.S. federal income tax considerations generally affecting the Funds and its shareholders that is intended to supplement the discussion contained in the Funds' prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Funds or its shareholders, and the discussion here and in the Funds' prospectus is not intended as a substitute for careful tax planning.

The Funds' shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the Funds until a shareholder begins receiving payments from their retirement account. Because each shareholder's tax situation is different, shareholders should consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Qualification as a Regulated Investment Company ("RIC"). Each series of the Trust is treated as a separate entity for federal income tax purposes. The Funds have elected, and intend to qualify each year, to be treated as a RIC under Subchapter M of the Code. To qualify as a RIC, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities

or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in “qualified publicly traded partnerships” (*i.e.*, partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income); and (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the market value of the Fund’s assets is represented by cash, securities of other RICs, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund’s assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. government securities or securities of RICs) of any one issuer, in the securities (other than the securities of other RICs) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more “qualified publicly traded partnerships.”

As a RIC, a Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it timely distributes to its shareholders, provided that it satisfies a minimum distribution requirement. To satisfy the minimum distribution requirement, a Fund must distribute to its shareholders at least the sum of (i) 90% of its “investment company taxable income” (*i.e.*, generally, its taxable income other than its net capital gain, computed without regard to the dividends-paid deduction, plus or minus certain other adjustments), and (ii) 90% of its net tax-exempt income for the taxable year. A Fund will be subject to income tax at regular corporate tax rates on any taxable income or gains that it does not distribute to its shareholders. Each Fund’s policy is to distribute to its shareholders all of its investment company taxable income (computed without regard to the dividends-paid deduction) and any net realized long term capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes. However, the Funds can give no assurances that distributions will be sufficient to eliminate all taxes.

If, for any taxable year, a Fund were to fail to qualify as a RIC under the Code or were to fail to meet the distribution requirement, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, in the event of a failure to qualify, a Fund’s distributions, to the extent derived from the Fund’s current and accumulated earnings and profits, including any distributions of net long-term capital gains, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends-received deduction in the case of corporate shareholders. Moreover, if a Fund were to fail to qualify as a RIC in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a RIC. Under certain circumstances, a Fund may cure a failure to qualify as RIC, but in order to do so the Fund may incur significant Fund-level taxes and may be forced to dispose of certain assets. If a Fund fails to qualify as a RIC for a period greater than two taxable years, the Fund would generally be required to recognize, and would generally be subject to a corporate level tax with respect to, any net built-in gains with respect to certain of its assets upon a disposition of such assets within ten years of qualifying as a RIC in a subsequent year.

Federal Excise Tax. To avoid a non-deductible excise tax, a Fund must also distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12 month period ending on October 31 during such year, and (iii) any amounts from the prior calendar year that were not distributed and on which no federal income tax was paid by the Fund or shareholders.

If a Fund has a “net capital loss” (that is, capital losses in excess of capital gains) for a taxable year, the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year. Those net capital losses can be carried forward indefinitely to offset capital gains, if any, in years following the year of the loss. Under certain circumstances, a Fund may elect to treat certain losses as though they were incurred on the first day of the taxable year following the taxable year in which they were actually incurred.

At June 30, 2016, each Fund had capital loss carryforwards, which reduce a Fund’s taxable income arising from future net realized gains on investments, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of distributions to shareholders which would otherwise be necessary to relieve a Fund of any liability for federal tax. Pursuant to the Code, the character of such capital loss carryforwards is as follows:

	Not Subject to Expiration		Total
	Short-Term	Long-Term	
Genea Fund	\$128,692	-	\$128,692
Growth Fund	\$111,106	-	\$111,106

Distributions to Shareholders. A Fund’s net investment income generally consists of interest and dividend income, less expenses. Net realized capital gains for a fiscal period are computed by taking into account any capital loss carryforward of the applicable Fund. Taxable dividends and distributions are subject to tax whether you receive them in cash or in additional shares.

Distributions of net investment income and net short-term capital gains are taxable to shareholders as ordinary income or, for noncorporate shareholders, as qualified dividend income.. Distributions from a Fund’s net capital gain (i.e., the excess of the Fund’s net long-term capital gains over its net short-term capital losses) are taxable to shareholders as long-term capital gains regardless of the length of time shares have been held. In general, to the extent that a Fund receives qualified dividend income, the Fund may report a portion of the dividends it pays as qualified dividend income, which for noncorporate shareholders is subject to U.S. federal income tax rates of up to 20%. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (*i.e.*, foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, and foreign corporations if the stock with respect to which the dividend was paid is readily tradable on an established securities market in the United States). A dividend will not be treated as qualified dividend income to the extent that (i) the shareholder has not held the shares on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become “ex-dividend” with respect to such dividend, (ii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iii) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. In order for a dividend on certain preferred stock to be treated as qualified dividend income, the shareholder must have a holding period of at least 91 days during the 181-day period beginning on the date that is 90 days before the date on which the stock becomes ex-dividend as to that dividend. The holding period requirements described in this paragraph apply to shareholders’ investments in a Fund and to the Fund’s investments in underlying dividend-paying stocks. Distributions received by a Fund from another RIC will be treated as qualified dividend income only to the extent so reported by such other RIC. If 95% or more of a Fund’s gross income (calculated without taking into account net capital gain derived from sales or other

dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income. Dividends paid by a Fund that are attributable to dividends received by the Fund from domestic corporations may qualify for the dividends-received deduction for corporate shareholders of the Fund.

There is no requirement that the Funds take into consideration any tax implications when implementing their investment strategies. If a Fund's distributions exceed its earnings and profits, all or a portion of the distributions may be treated as a return of capital to shareholders. A return of capital distribution generally will not be taxable but will reduce each shareholder's tax basis, resulting in a higher capital gain or lower capital loss when the shares on which the distribution was received are sold. After a shareholder's tax basis in the shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder's shares.

Each shareholder who receives taxable distributions in the form of additional shares will be treated for U.S. federal income tax purposes as if receiving a distribution in an amount equal to the amount of money that the shareholder would have received if he or she had instead elected to receive cash distributions. The shareholder's aggregate tax basis in shares of the applicable Fund will be increased by such amount.

A dividend or distribution received shortly after the purchase of shares reduces the net asset value of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the net asset value of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other dividends or distributions.

A dividend or other distribution by a Fund is generally treated under the Code as received by the shareholders at the time the dividend or distribution is made. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable as if received on December 31.

Shareholders should note that the Funds may make taxable distributions of income and capital gains even when share values have declined.

The Funds (or their administrative agent) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held your shares for a full year, a Fund may designate and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Fund.

Sales, Exchanges or Redemptions. Any gain or loss recognized on a sale, exchange, or redemption of shares of a Fund by a shareholder who is not a dealer in securities will generally, for individual shareholders, be treated as a long-term capital gain or loss if the shares have been held for more than twelve months and otherwise will be treated as a short-term capital gain or loss.

Any loss realized upon redemption of shares within six months from the date of their purchase will be treated as a long term capital loss to the extent of any amounts treated as distributions of long term capital gains during such six month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the applicable Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a “surviving spouse” for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, dividends, interest and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder’s net investment income.

Under the Code, the Funds will be required to report to the Internal Revenue Service (“IRS”) all distributions of taxable income and capital gains as well as gross proceeds from the redemption of Fund shares, except in the case of exempt shareholders, which includes most corporations. The Funds will also be required to report tax basis information for such shares and indicate whether these shares had a short-term or long-term holding period. If a shareholder has a different basis for different shares of a Fund in the same account (*e.g.*, if a shareholder purchased shares in the same account at different times for different prices), the Fund calculates the basis of the shares sold using its default method unless the shareholder has properly elected to use a different method. Each Fund’s default method for calculating basis is the High Cost method, under which the shares with the highest cost are redeemed first. A shareholder may elect, on an account-by-account basis, to use a method other than High Cost by following procedures established by the Funds or their administrative agent. If such an election is made on or prior to the date of the first exchange or redemption of shares in the account and on or prior to the date that is one year after the shareholder receives notice of the applicable Fund’s default method, the new election will generally apply as if the High Cost method had never been in effect for such account. Shareholders should consult their tax advisers concerning the tax consequences of applying the High Cost method or electing another method of basis calculation. Shareholders also should carefully review any cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

Tax Treatment of Complex Securities. The Funds may invest in complex securities and these investments may be subject to numerous special and complex tax rules. These rules could affect the Funds’ ability to qualify as a RIC, affect whether gains and losses recognized by the Funds are treated as ordinary income or capital gain, accelerate the recognition of income to the Funds and/or defer the Funds’ ability to recognize losses, and, in limited cases, subject the Funds to U.S. federal income tax on income from certain of its foreign securities. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Funds.

The Funds may invest in, or hold, debt obligations that are in the lowest rating categories or that are unrated, including debt obligations of issuers not currently paying interest or that are in default. Investments in debt obligations that are at risk of or are in default present special tax issues for the Funds. Federal income tax rules are not entirely clear about issues such as when the Funds may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and interest and whether certain exchanges of debt obligations in a workout context are taxable. These and other issues will be addressed by the Funds, in the event it invests in or holds such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a RIC and does not become subject to U.S. federal income or excise tax.

A Fund may invest in REITs. Investments in REIT equity securities may require a Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, a Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. A Fund’s investments in REIT equity securities may at other

times result in a Fund's receipt of cash in excess of the REIT's earnings; if a Fund distributes these amounts, these distributions could constitute a return of capital to such Fund's shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the REIT's current and accumulated earnings and profits. Capital gain dividends paid by a REIT to a Fund will be treated as long-term capital gains by the Fund and, in turn, may be distributed by the Fund to its shareholders as a capital gain distribution. Dividends received by a Fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at regular corporate rates without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

REITs in which a Fund invests often do not provide complete and final tax information to the Funds until after the time that the Funds issue a tax reporting statement. As a result, a Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, a Fund (or its administrative agent) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

The Funds may be subject to foreign withholding taxes on dividends and interest earned with respect to securities of foreign corporations. Tax conventions between certain countries and the U.S. may reduce or eliminate such taxes in some cases.

Tax Shelter Reporting Regulations. Under Treasury regulations, if a shareholder recognizes a loss with respect to a Fund's shares of \$2 million or more for an individual shareholder, or \$10 million or more for a corporate shareholder, in any single year (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. A shareholder who fails to make the required disclosure to the IRS may be subject to adverse tax consequences, including substantial penalties. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Backup withholding. Pursuant to the backup withholding provisions of the Code, distributions of any taxable income and capital gains and proceeds from the redemption of Fund shares may be subject to withholding of federal income tax at the rate of 28% in the case of non-exempt shareholders who fail to furnish the Funds with their taxpayer identification numbers or with required certifications regarding their status under the federal income tax law, or if the IRS notifies the Funds that such backup withholding is required. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld. Corporate and other exempt shareholders should provide the Funds with their taxpayer identification numbers or certify their exempt status in order to avoid possible erroneous application of backup withholding. Backup withholding is not an additional tax and any amounts withheld may be credited against a shareholder's ultimate federal income tax liability if proper documentation is provided. The Funds reserve the right to refuse to open an account for any person failing to provide a certified taxpayer identification number.

Non-U.S. Investors. Any non-U.S. investors in the Funds may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in a Fund. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Funds may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of a Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Funds. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

A U.S. withholding tax at a 30% rate is imposed on dividends effective July 1, 2014 (and proceeds of sales in respect of Fund shares (including certain capital gain dividends) received by Fund shareholders beginning after December 31, 2018) for shareholders who own their shares through foreign accounts or foreign intermediaries if certain disclosure requirements related to U.S. accounts or ownership are not satisfied. The Funds will not pay any additional amounts in respect to any amounts withheld.

This discussion and the related discussion in the Prospectus have been prepared by the Funds’ management. The information above is only a summary of some of the federal income tax considerations generally affecting the Funds and their shareholders. No attempt has been made to discuss individual tax consequences, and this discussion should not be construed as applicable to all shareholders’ tax situations. **Investors should consult their own tax advisors to determine the suitability of the Funds and the applicability of any state, local or foreign taxation.**

DISTRIBUTION AGREEMENT

The Trust has entered into a Distribution Agreement (the “Distribution Agreement”) with Quasar Distributors, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202 (the “Distributor”), pursuant to which the Distributor acts as the Funds’ distributor, provides certain administration services and promotes and arranges for the sale of Fund shares. The offering of the Funds’ shares is continuous. The Distributor, USBFS, and Custodian are all affiliated companies. The Distributor is a registered broker-dealer and member of FINRA.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds’ outstanding voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or “interested persons” (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund’s on 60 days’ written notice when authorized either by a majority vote of the Funds’ shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not “interested persons” (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days’ written notice, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act).

Distribution Plan

The Funds have adopted a Distribution Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act under which each Fund’s Investor Class shares pay the Distributor an amount which is accrued daily and paid quarterly, at an annual rate of up to 0.25% of the average daily net assets of each Fund’s Investor Class shares. Amounts paid under the Plan, by the Funds, are paid to the Distributor to reimburse it for costs of the services it provides and the expenses it bears in the distribution of the Funds’ shares, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Funds’ shares to prospective investors; and preparation, printing and distribution of sales literature and advertising materials. Such fee is paid to the Distributor each year only to the extent of such costs and expenses of the Distributor under the Plan actually incurred in that year. In addition, payments to the Distributor under the Plan reimburse the Distributor for payments it makes to selected dealers and administrators which have entered into Service Agreements with the Distributor of periodic fees for services provided to shareholders of the Fund. The services provided by selected dealers pursuant to the Plan are primarily designed to promote the sale of shares of the Funds and include the furnishing of office space and equipment, telephone facilities, personnel and assistance to the Funds in servicing such shareholders. The services provided by the administrators pursuant to the Plan are designed to provide support services to the Funds and include establishing and maintaining shareholders’ accounts and records, processing purchase and redemption transactions, answering routine client inquiries regarding the Funds and providing other services to the Fund as may be required.

Under the Plan, the Trustees will be furnished quarterly with information detailing the amount of expenses paid under the Plan and the purposes for which payments were made. The Plan may be terminated at any time by vote of a majority of the Trustees of the Trust who are not interested persons. Continuation of the Plan is considered by such Trustees no less frequently than annually. With the exception of the Distributor and the Adviser, in their capacities as the Funds’ principal underwriter and distribution coordinator, respectively, no interested person has or had a direct or indirect financial interest in the Plan or any related agreement.

While there is no assurance that the expenditures of the Funds’ assets to finance distribution of shares will have the anticipated results, the Board believes there is a reasonable likelihood that one or more of such benefits will result, and because the Board is in a position to monitor the distribution expenses, it is able to determine the benefit of such expenditures in deciding whether to continue the Plan.

Any material amendment to the Plan must be approved by the Board, including a majority of the Independent Trustees, or by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes. The Plan may be terminated, with respect to a class or classes of the Funds, without penalty at any time: (1) by vote of a majority of the Board, including a majority of the Independent Trustees; or (2) by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes.

The following tables describe the allocation of Rule 12b-1 fees during the periods indicated.

SHAREHOLDER SERVICING PLAN

The Trust has also adopted a Shareholder Service Plan under which the Funds' Investor Class shares may pay a fee of up to 0.15% and the Funds' Institutional Class shares may pay a fee of up to 0.10% of the average daily net assets of the Funds' Investor Class shares and Institutional Class shares, respectively, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus, other group accounts or accounts traded through registered securities clearing agents provided to the Funds by intermediaries such as banks, broker-dealers, financial advisers or other financial institutions. Because the Funds' pay shareholder service fees on an ongoing basis, your investment cost over time may be higher than paying other types of sales charges.

The following tables describe the shareholder servicing plan fees paid by the Funds during the periods indicated.

MARKETING AND SUPPORT PAYMENTS

The Adviser, out of its own resources and without additional cost to the Funds or its shareholders, may provide additional cash payments or other compensation to certain financial intermediaries who sell shares of the Funds. Such payments may be divided into categories as follows:

Support Payments. Payments may be made by the Adviser to certain financial intermediaries in connection with the eligibility of the Funds to be offered in certain programs and/or in connection with meetings between the Funds' representatives and financial intermediaries and its sales representatives. Such meetings may be held for various purposes, including providing education and training about the Funds and other general financial topics to assist financial intermediaries' sales representatives in making informed recommendations to, and decisions on behalf of, their clients.

Entertainment, Conferences and Events. The Adviser also may pay cash or non-cash compensation to sales representatives of financial intermediaries in the form of (i) occasional gifts; (ii) occasional meals, tickets or other entertainments; and/or (iii) sponsorship support for the financial intermediary's client seminars and cooperative advertising. In addition, the Adviser pays for exhibit space or sponsorships at regional or national events of financial intermediaries.

The prospect of receiving, or the receipt of additional payments or other compensation as described above by financial intermediaries may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Funds, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund shares.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Asset Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

FINANCIAL STATEMENTS

The Funds' annual report to shareholders for the fiscal year ended June 30, 2016, is a separate document and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein are incorporated by reference into this SAI.

Appendix A

DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

A *Standard & Poor's* short-term issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation having an original maturity of no more than 365 days. The following summarizes the rating categories used by Standard & Poor's for short-term issues:

“A-1” – A short-term obligation rated “A-1” is rated in the highest category and indicates that the obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” – A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

“A-3” – A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

“B” – A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

“C” – A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

“D” – A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor's believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to “D” if it is subject to a distressed exchange offer.

Local Currency and Foreign Currency Risks – Standard & Poor's issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer's foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Moody's Investors Service ("Moody's") short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1" – Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

"P-2" – Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

"P-3" – Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

"NP" – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Fitch, Inc. / Fitch Ratings Ltd. ("Fitch") short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term ratings are assigned to obligations whose initial maturity is viewed as "short-term" based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

"F1" – Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

"F2" – Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

"F3" – Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

"B" – Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

"C" – Securities possess high short-term default risk. Default is a real possibility.

"RD" – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

"D" – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

The *DBRS® Ratings Limited* (“*DBRS*”) short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The R-1 and R-2 rating categories are further denoted by the sub-categories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” – Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” – Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” – Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” – Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” – Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” – Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” – Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” – Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” – Short-term debt rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Credit Ratings

The following summarizes the ratings used by *Standard & Poor's* for long-term issues:

“AAA” – An obligation rated “AAA” has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

“AA” – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

“A” – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

“BBB” – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” – Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

“BB” – An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

“B” – An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

“CCC” – An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

“CC” – An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred, but Standard & Poor's expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” – An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

“D” – An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor's believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and

where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to "D" if it is subject to a distressed exchange offer.

Plus (+) or minus (-) – The ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

"NR" – This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Local Currency and Foreign Currency Risks - Standard & Poor's issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer's foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Moody's long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more. Such ratings reflect both the likelihood of default on contractually promised payments and the expected financial loss suffered in the event of default. The following summarizes the ratings used by Moody's for long-term debt:

"Aaa" – Obligations rated "Aaa" are judged to be of the highest quality, subject to the lowest level of credit risk.

"Aa" – Obligations rated "Aa" are judged to be of high quality and are subject to very low credit risk.

"A" – Obligations rated "A" are judged to be upper-medium grade and are subject to low credit risk.

"Baa" – Obligations rated "Baa" are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

"Ba" – Obligations rated "Ba" are judged to be speculative and are subject to substantial credit risk.

"B" – Obligations rated "B" are considered speculative and are subject to high credit risk.

"Caa" – Obligations rated "Caa" are judged to be speculative of poor standing and are subject to very high credit risk.

"Ca" – Obligations rated "Ca" are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

"C" – Obligations rated "C" are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from "Aa" through "Caa." The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

The following summarizes long-term ratings used by *Fitch*:

“AAA” – Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” – Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” – Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” – Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

“BB” – Securities considered to be speculative. “BB” ratings indicate that there is an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” – Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present.

“CCC” – A “CCC” rating indicates that substantial credit risk is present.

“CC” – A “CC” rating indicates very high levels of credit risk.

“C” – A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings, but are instead rated in the “B” to “C” rating categories, depending upon their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

The *DBRS* long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS for long-term debt:

“AAA” - Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” – Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” – Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” – Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” – Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” – Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” – Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” – A security rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

A *Standard & Poor’s* U.S. municipal note rating reflects Standard & Poor’s opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, Standard & Poor’s analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” – A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” – A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” – A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

Moody’s uses the Municipal Investment Grade (“MIG”) scale to rate U.S. municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer’s long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels – “MIG-1” through “MIG-3” while speculative grade short-term obligations are designated “SG”. The following summarizes the ratings used by Moody’s for short-term municipal obligations:

“MIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” – Is assigned to an unrated obligation.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody’s evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody’s evaluation of risk associated with the ability to receive purchase price upon demand (“demand feature”). The second element uses a rating from a variation of the MIG rating scale called the Variable Municipal Investment Grade or “VMIG” scale. The rating transitions on the VMIG scale differ from those on the Prime scale to reflect the risk that external liquidity support generally will terminate if the issuer’s long-term rating drops below investment grade.

VMIG rating expirations are a function of each issue’s specific structural or credit features.

“VMIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-2” – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-3” – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

“NR” – Is assigned to an unrated obligation.

About Credit Ratings

A *Standard & Poor’s* issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects Standard & Poor’s view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Moody’s credit ratings must be construed solely as statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities.

Fitch’s credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Fitch credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested. Fitch’s credit ratings cover the global spectrum of corporate, sovereign (including supranational and sub-national), financial, bank, insurance, municipal and other public finance entities and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

DBRS credit ratings are opinions based on the quantitative and qualitative analysis of information sourced and received by DBRS, which information is not audited or verified by DBRS. Ratings are not buy, hold or sell recommendations and they do not address the market price of a security. Ratings may be upgraded, downgraded, placed under review, confirmed and discontinued.

Appendix B

Zevenbergen Capital Investments LLC Proxy Voting Policy and Procedures

(Effective January 22, 2016)

INTRODUCTION

Zevenbergen Capital (ZCI) has adopted and implemented policies and procedures designed to ensure proxies are voted in the best interest of clients, in accordance with its fiduciary duties and SEC rule 206(4)-6 of the Investment Advisers Act of 1940. ZCI's authority to vote proxies for clients is established by the firm's investment advisory agreements or comparable documents and its Proxy Voting Policies and Procedures have been tailored to reflect these obligations. In addition to SEC requirements governing advisers, the firm's proxy voting policies also reflect the long-standing fiduciary standards and responsibilities for ERISA accounts.

STATEMENT OF POLICIES

In voting shares held for clients in its fiduciary capacity, ZCI's policy is to:

- Consider only the best interests of the fiduciary accounts' beneficiaries
- Consider economic and ethical implications in determining the best interests of the beneficiaries
- Base the decision on how to vote using reasonable skill and care in determining the issues involved
- Vote proxies at the written request of a client (as may be allowed), should their specific choice of votes differ from the manner in which ZCI would vote under its own Proxy Voting Guidelines
- Resolve material conflicts of interest in the best interest of clients
- Vote on every proxy issue, whether or not the vote supports management
- Make every effort to vote proxies for all shares unless voting responsibility has been retained by the client or securities are on loan
- Vote proxies of ERISA accounts with duty of loyalty, prudence, compliance with the plan, as well as a duty to avoid prohibited transactions

ZCI uses its Proxy Voting Guidelines as the template for voting all proxies. The firm's Proxy Voting Guidelines are updated and reviewed at least annually. Proxy voting issues that fall outside of ZCI's established Proxy Voting Guidelines are reviewed and voted on a case-by-case basis by ZCI's Proxy Voting Committee, taking into consideration all relevant facts and circumstances at the time of the vote.

The basis for the formulation of ZCI's Proxy Voting Guidelines has been developed through the firm's internal research and use of outside resources (i.e. review of corporate governance and proxy voting issues and/or analysis of shareholder and management proposals, etc.).

As a small firm, it is unlikely for ZCI to engage in shareholder activism with respect to pending proxy voting issues.

ZCI makes available to clients upon request, information on how their proxies were voted as soon as is practicable after the request and in a manner that is practical given the firm's size and resources. In addition, ZCI's Proxy Voting Policies and Procedures and the Proxy Voting Guidelines are provided to all clients and prospective clients upon request. All requests for proxy voting information may be made by mail, email or by calling ZCI's offices in Seattle, Washington. By general policy, ZCI does not disclose to third parties how client proxies were voted.

CONFLICT OF INTEREST

Any material conflicts of interest (i.e. ballot items sponsored by one of ZCI's significant clients, ballots for securities issued by ZCI or its affiliates, client shareholder activism ballot sponsorship etc.) are resolved in the best interest of clients. All conflicts of interest are voted in accordance with the firm's pre-determined Proxy Voting Guidelines. Should the conflict be unique to ZCI's Guidelines and involve discretion, the firm votes in accordance with advice provided by an independent third-party qualified in proxy proposal research and voting recommendations.

RESPONSIBILITY AND OVERSIGHT

ZCI's Chief Compliance Officer (CCO) has oversight responsibility for the firm's Proxy Voting Policies and Procedures. Additionally, ZCI has formed a Proxy Voting Committee, with membership to include at least: the Senior Investment Associate responsible for proxy voting at ZCI, the CCO and a member of the Portfolio Management Team. The Proxy Voting Committee has the following responsibilities:

Oversee the proxy voting process

- Determine the firm's process for voting (i.e. Committee voting structure, etc.)
- Determine the firm's procedures for voting issues that do not fall into one of the categories defined under ZCI's Proxy Voting Guidelines
- Develop, authorize, implement and update proxy voting policies and procedures
- Monitor legislative and corporate governance developments and coordinate any corporate or other communication related to proxy issues
- Consult with Portfolio Managers as necessary for company specific analysis
- Meet at least annually and as necessary to fulfill its responsibilities

ZCI has a designated Investment Associate with day-to-day responsibility for proxy voting and record keeping. Appropriate backup support has also been assigned.

PROCEDURES

ZCI utilizes an independent, third-party proxy service vendor to facilitate voting and record keeping for all client proxy voting. ZCI maintains total control over voting.

ZCI's proxy service vendor receives proxy cards for securities held in client portfolios and enters proxy details on-line for ZCI's review. ZCI then reconciles proxies received by the proxy service vendor against holdings in accounts for which the firm has voting responsibility on the record date (with consideration for accounts participating in securities lending programs, as well as trade and settlement issues). ZCI makes every effort to resolve any reconciliation discrepancies, but may be unable to reconcile shares for accounts participating in securities lending programs. ZCI then votes proxies on-line through the proxy service vendor in accordance with the firm's Proxy Voting Guidelines, unless otherwise directed by clients (as may be allowed), or in keeping with voting procedures for conflict securities described earlier in this Policy. Should a proxy item fall outside the Proxy Voting Guidelines (and not identified as a conflict of interest), the Proxy Voting Committee will meet to determine how the firm will vote the item through simple majority. Should the Committee be unable to reach a simple majority on a given item, ZCI will vote in accordance with the recommendation of the same independent third-party proxy research firm used in determining the votes for conflicts of interest described previously.

CLIENT DIRECTED VOTING

ZCI has a relationship whereby the client requires ZCI to vote proxies according to separate guidelines provided by the client. The firm uses the third-party proxy voting service provider (described above) to maintain the guidelines and to facilitate voting.

ZCI will make every effort to follow the procedures set forth in this policy for this client, but it may be necessary to vary from these procedures given the nature of the relationship. One such variance is how ZCI will vote proxy items that fall outside the client's guidelines. ZCI will not put these items to committee vote, but will instead vote according to the third-party service provider's recommendation. Additionally, ZCI maintains separate records for this client's voting activity.

CLIENT DISCLOSURE

ZCI's Proxy Voting Policy and Procedures are described in Part 2A of the firm's Form ADV. In addition to this description, ZCI's ADV discloses to clients how to direct ZCI to vote on a particular item or to request a record of votes cast on their behalf.

RECORD KEEPING

ZCI's proxy service vendor maintains transaction history for all proxy ballots voted. In addition, ZCI keeps a complete record of all proxy votes for all clients in either hard copy or electronic format (filed based on proxy meeting date). All records are retained for ten (10) years from the calendar year to which the records are related, with the past two (2) full years held on-site.

ZCI maintains records of all proxies voted, as well as copies of the firm's policies and procedures, and Proxy Voting Guidelines. Copies of any documents created that are material in the firm's decision how to vote proxies on behalf of a client are also kept (i.e. Committee voting record on ballot items for which ZCI does not have prior established voting instruction as part of its Proxy Voting Guidelines, etc.). This includes any written client request for proxy voting records and ZCI's associated response.

ZCI maintains accurate proxy voting records to enable the client to determine whether the firm is fulfilling its obligations. ZCI's records include:

- company name and meeting date
- issues voted on and record of the vote
- number of shares voted
